

Danube Geoparks Film Shooting - 2

another 3 countries - 3400 km - 1850 GB recorded 4K video

INTERREG Danube GeoTour project

The goal of the international project is innovative and sustainable tourism development, based on the rich geological heritage of geoparks in the Danube Region. Project partners develop the Danube GeoTour, a network of geoproducts and itineraries that connect people to the geoparks. The production of Danube Geoparks promotional image film has finished shooting phase two.

The project is co-funded by European Union funds (ERDF, IPA).
